COMPANY, FORT WORTH, TEXAS.

PRESENTIMENT.

llsap Wreck - Another Strange Story.

Strange Story.

[Terrell Times.]

nole Johnnie Hardin arrived of last week with the intening a tripout West, his wife, agreed to accompany him, thearted and declared she to go. She knew some accide befall them if she went, ed, and only yielded after presistent persuasion. The win sequel of that dreadshows all too clearly how reprophetic vision portrayed disaster. But this is not instance wherein the old prophetic warning. Some the was induced to travel on and actually got to the depoting and all the preliminary into the former stock of Moring & Blanchard's creditors think that they can get their money that way.

The steamer Alpha left for Shreve port to-day, to connect with the Laura Lee for New Orleans, with about five hundred bales of cotton, and other freight for the lakes.

and positively refused to get that day the very train upon was to ride got wrecked, unber of the passengers and a large number wound-fardin was always afraid s, and the company of the passengers and a large number wound-fardin was always afraid s, and the company of the post of the passengers and a large number wound-fardin was always afraid s. fardin was always afraid of its, and the trip upon which fured was her first, and in lity will be her last, since she received is said to have n incurable in jury. The such superstitutious fears, an incident in her history, ained how she had been I through life to evade every nachinery run by steam.

private conveyance in with her two brothers, protectors on earth. ad been her fears of steam acted a promise from the hat they would in no wise team machinery. A num-mills were passed on the constant warning and tept the boys from going tplosive mills. One day, she relaxed her vigilance, y a terrific explosion. Hasmet if both of her brothers

though she frequently rode was the Mississippi. One and her husband were in and her husband were in and were anxious to get active of Helena, a famous was about to port, and she ok fire and burned to the at the wharf just as she o leave the port. The name o leave the port. The name is Mrs. Henry Brown, me is, or was, a few years ing carrant county, near Fort prov

Firemen's Hall.

only in New Orleans and St. Louis are be-ginning to realize that it is to their interest to take advantage of the exceptional induce. ments our merchants are prepared to offer. Sales of general merchandise during the present month have been greatly in excess of the business for the same period in 1883, and with each ad-vancing stride toward commercial greatness stocks are doubled up and new territory invaded. Already immense quantities of goods are sold by our leading dealers to merchants in New Mexico, and Fort Worth trade with

that part of the country is yet in its infancy.
Dry goods are quoted without change from yesterday's report and a thorough canvass of the dry goods emporiums, both wholesale which we cannot better report than to express the remarks of the B. C. Evans company, who at some length explained that at this season of the year dealers in their lines did not expect a very lines.

Fish and Oysters.

Red sheephead and trout, per pound, 12½c; dressed taffish, 12½c; dressed taffis in their lines did not expect a very heavy trade, but that their sales somewhat surprised even themselves. Said the head sales-man in the wholesale department, which embraces dry goods, boots and shoes, notions, hats and carpets, "we have been exceedingly busy, sometimes for days having more than we can attend to, and our company are working a full force of employes, and when the spring trade opens up our trade will be simpiy" immense. In a retail way Mr. Massle, manager of the B. C. Evans retail departcannot buy at home, was constantly increasing, having just shipped several nice bills of carpets and uphoistery goods to Paris, Texas, and Jacksboro while the GAZETE reporter was gathering these items.

The sentiments of this firm but voice the condition of the Texas, and Jacksboro white the GAzettr reporter was gathering these items.

The sentiments of this firm but
voice the condition of the trade all around
town. Messrs, Taylor & Barr have established an order trade which will prove a great
convet lence to persons living remote from
the city, and as soon as its advantages are
thoroughly understood, the requirements of
the trade will necessarily make this an imFurniture styles. CATTLE—Receipts 1,60; slow and weak, but thoroughly understood, the requirements of the trade will necessarily make this an im-

portant feature in their business, Cotton quotations are unchanged, though the market is a shade firmer and more interest was manifested among dealers yesterday than for, several days past. The receipts continue light. It is evident that the season for this part of the country is rapidly drawing to a close, and the scattering lois yet unsold are not of sufficient importance to create any propersy in these. not of sufficient importance to create any

special interest among local buyers.

In the grocery market there is no change worthy of note except that meats of all kind continue firm at the advanced quotations in yesterdays' report. Trade has been ex-ceptionally good for the season and the present outlook for the future is bright and promising. Liquors of all kinds are quoted without

change. THE BUBBER INDUSTRY.

The rubber industry of the United States has no rival in foreign countries. There is something like \$75,000,000 invested in the business of manufacturing rubber goods, \$10,000,. and shoe industry. The total number of employes is placed at 15,000, and the total number of factories is placed at 120. According to a recent census bulletin the value of the annual product is \$251,000,000. Some 30,000 tons of raw rubber are imported every year, which, when combined with other materials in manufacturing, amount to 20,000 tons. 0,0 of which is confined to the rubber boot and shoe industry. The total number of emin manufacturing, amount to 300,000 tons. The market price of the raw materials has been forced up to \$1.25 per pound, while six years ago the price was scarcely fifty cents. In consequence of the advance in price several substances have been prepared as substitutes for it, of which celluloid is the most important.

Cheese is generally regarded as a luxury, and for the most part used as such in this country. It is, however, a substantial food, and in many parts of Europe it is used in the place of other animal food. In nutritive those \$400 higher and seasons are seasons are series of the season of several joint stock.
